Presentation Synopsis:

- **Changing Economy & Environmental Impacts**
- **Historical Building Practices vs Modern**
- **LEED, Sustainability, Carbon Accounting – Green Building**
- **What Strategies are Available to Control Costs**

Instructors:

Carl Salas, PE, Salas O'Brien Engineers, Inc.

Mr. Salas is the Founding Principal of Salas O'Brien Engineers, Inc., co-founded in 1979. He has leveraged his expertise to develop and present a nationwide series of seminars regarding Energy Auditing, Energy Management Systems, CFC Mitigation, and Distributed Generation. Along with his "real world" approach to energy and renewables project applications, he has assisted in project financial accounting, financial justification, and life cycle costing. Most recently he has worked to bridge the energy and financial aspects of the industry with the variables (and uncertainties) associated with greenhouse gas and carbon trading.

Donald Young, VP / Sr. Construction Manager, Salas O'Brien, Engineers, Inc.

Mr. Young has guided the development of the construction department since 2003. While working in construction management as an undergraduate at US Santa Barbara, Mr. Young worked on several projects on campus. Bringing this experience when he joined the firm, Mr. Young has been committed to growing and developing the construction department and providing full service construction management to Salas O'Brien's clients and the industry.
